

## RGL33

### QUICKDRAW SLING

Quickdraw slings are a useful tool manufactured using highly durable Dyneema®/nylon yarn.

This short link can be used as a way to bridge the gap between a casualty and rescuer, so a rescue can be performed. Also commonly used as a mountaineering sling.

If used with a rope grab without extending its length, it ensures the user is distanced from the rope during work, freeing up the working area and also ensuring the rope is protected from sharp tools.

Can withstand repeated use.

We offer a range of sizes which is identified by colour coded stitching.

A range of steel or aluminium connectors are available.

Accredited to: EN 566:2017

Material: 13mm Dyneema®/nylon

Breaking load: >22kN

Length (EWL)/Weight: 0.11m = 8g (YELLOW)  
0.13m = 9g (BLUE)  
0.16m = 10g (ORANGE)  
0.2m = 12g (GREEN)  
0.3m = 16g (RED)
