HARNES PREMIUM ROPE ACCESS 5-PT

This harness is designed for rope access, but can be used for other working at height applications.

Packed with a number of high quality support pads on the legs, waist and shoulders to ensure working throughout the day in this harness is a comfortable experience. Six tool loops in total (4 on the waistbelt and 1 on each leg pad) allows the user to attach all their rope access equipment in easily reachable areas.

Yellow loops located around the ventral attachment point allow the attachment of a bosun's chair. The design of the chest area stops the straps from cutting into the neck.

The chest ascender comes as standard, but can be easily removed or added. Not restricted to rope access work this harness can be used in work positioning, fall arrest and restraint. The rear D ring is also approved for rescuing from, keeping the casualty upright during rescue.

- / Front, rear side & ventral attachment point
- / Waist, leg & shoulder support pads
