

RGA4H/EDGE

FALL ARREST BLOCK WITH RECOVERY WINCH AND STEADYING HANDLE - 15M

The RGA4H/EDGE is a three way retrieval block with the added benefit of a steadying handle fitted with an up/down winch mechanism and the standard fall arrest capability.

The addition of a shock pack means this block can be used whilst working over the edge. However horizontal use or foot level attachment should still be discouraged as there is a risk of serious injury from striking objects.

This unit can be used as a standard fall arrest block, but in the event of a fall the operative can be winched up or down to safety almost immediately.

The winch function is for use only as a recovery provision and not for access/egress. The RGA4/EDGE is supplied with galvanised wire cable.

Accredited to: EN 360:2002
EN 1496:2017 B
VG11.060

Line material: 5mm galvanised wire cable

Case material: Alloy

Shock pack material: Polyester

Connector: Double action high tensile steel swivel karabiner

Weight: 11.2kg

Max user weight: 140kg

Max force: <6kN

Handle turn ratio: 1:10

Handle force ratio: 1:10

Built-in fall indicator

Recovery winch

Shock absorber
